**PRESS RELEASE**

**SEATORQUE**

**The BOSS™**  
Bolt On Shaft System

**SEATORQUE CONTROL SYSTEMS NAMES SALES & SERVICE PARTNERS IN THE USA AND EUROPE**

**STUART, FLORIDA.**

**ROSCIOLI YACHTING CENTER, INC** located in Ft. Lauderdale, Florida is a state-of-the art, multi-million dollar, full service yachting facility and shipyard. Over a hundred and twenty-five men and women make up the Roscioli Team. They are computer design specialists, carpenters, electricians, welders, captains, painters, mechanics, interior designers, furniture makers and propulsion specialists - all masters of their trade.

Roscioli Yachting Center will provide customer service and support for Seatorque products, including the sale and installation of new equipment, retro-fits, repairs, inspection, maintenance and other services.

**R O S C I O L I**

**MDS MARINE, LTD** (Marine Diesel Sweden) an installation, service, maintenance and repair facility in the UK, has been made an authorized customer service partner for Seatorque Control Systems in the UK and Europe.

As of 2010, MDS will provide customer service and support for Seatorque products, including the sale and installation of new equipment, retro-fits repairs, inspection, maintenance and other services.

David Madsen, and the team at MDS offer new product sales, engineering services and technical support, as well as on-site training for new and existing Seatorque customers.

Seatorque Control Systems, LLC is a Stuart, Florida-based manufacturer of propulsion systems for the marine industry. The main product line consists of the Seatorque Enclosed Shaft System "**The BOSS**", and Seatrack Power Steering systems. The **BOSS**, is the only internationally acclaimed, inboard driveline alternative available for the marine industry. Several yacht and ship builders around the world specify the **BOSS** as standard. Seatorque equipment can be found on vessels up to 200ft in length, both power and sail, and is supported by a global distribution network.
