

DRIVEN

By Seatorque Control Systems for the Marine Professional

Issue **1**

Welcome to the inaugural issue of **DRIVEN!**

At Seatorque, our founding principal is to push the envelope of what is possible in marine propulsion.

This single minded dedication to engineering excellence has enabled us to revolutionize propulsion systems for the world's leading industry builders, engineers, naval architects and designers. As we celebrate our 25th Anniversary, we plan to bring you informative and useful information in every future issue of DRIVEN in a quick and easy to read format that you will find as entertaining as it is valuable. Enjoy!

The Seatorque "BOSS" Bolt-On Shaft System

Our reputation has been defined by the global success of "The BOSS". This fully enclosed, bolt-on shaft system dramatically reduces driveline noise, vibration, drag, alignment issues, fuel burn and maintenance costs while low mechanical losses increase power available for propulsion. The system's features and benefits are many as, Seatorque propulsion is available for pleasure craft, super yacht, commercial, patrol, sailing and multihull applications.

You need to know!

Stay tuned or contact us for details of the New XM1 and XM2 Seatorque Propulsion Systems- Release Summer 2019!!

Halyard named exclusive European and Scandinavian distributor

Industry renowned and UK based Halyard has been named distributor for all Seatorque products for the European and Scandinavian markets.

"Seatorque produces an exceptional range of propulsion systems that perfectly aligns with our Halyard family of products," said David Johnson, Sales Director at Halyard. Halyard will show Seatorque equipment at Seawork on June 11th – 13th, stand PG117.

Twin Disc Pacific represents Seatorque in Australia and the Pacific markets

Some of the world's greatest boats are powered by Seatorque products. The Australian built Riviera Sports Motor Yacht 68 and sister ship Sports Motor Yacht 72 are true long-range adventure boats, and each comes standard with Seatorque Propulsion Systems for the ultimate cruising experience. Living is easy on the new generation Rivas.
